

# Safety instructions

## Risk of injuries and fire!

Incorrect handling of the table-top fireplace and the bioethanol can lead to serious injuries and fire.

- **Please read this instruction manual carefully before using the product.** Keep the manual for future reference and for the duration of owning the product.
- **IMPORTANT: Only use high-purity liquid bioethanol for the table-top fireplace.**
- **WARNING: Risk of fire and explosion!** Never pour bioethanol on a burning flame.
- **WARNING: Risk of deflagration!** Always light the bioethanol immediately after filling up the fireplace.
- Never leave ethanol residues in the tank and ignite it at a later time.
- **Do not add bioethanol when the table-top fireplace is still hot! Please make sure that the table-top fireplace and the tank are completely cooled down before adding new bioethanol.**
- Never leave the table-top fireplace unattended when lighted up.
- The table-top fireplace is **not a heating device**. The fireplace is only for decoration and is intended for private use only. Not suitable for commercial use or permanent use.
- Please make sure that the table-top fireplace is completely cooled down before first contact.
- To light up the bioethanol use a stick lighter or long match.
- Never extinguish the flame with water. Only use the extinguisher supplied by the manufacturer.
- This table-top fireplace is designed for outdoor use, but can also be used indoors with sufficient ventilation.
- The bioethanol burns virtually without residue, ventilation by means of an open window suffices in most cases.

## Caution! Always ensure sufficient oxygen supply!

- An incorrect handling of the table-top fireplace can lead to serious injuries (material damage / personal injuries)!
- The manufacturer accepts no liability for any damages which are caused by inappropriate use of the product.
- Due to the high surface heat, keep easily flammable materials at a sufficient distance.
- Please keep children, pets and people with reduced physical, sensory or mental abilities away from the table-top fireplace.
- Ensure that the surface for the table-top fireplace is on one level, dry, sufficiently stable and fireproof.
- Do not make any changes to the table-top fireplace and do not attach any additional parts.
- Do not move the fireplace when it is already lighted up or filled up with bioethanol.
- Do not put any objects in or on the table-top fireplace and do not burn materials.
- Carefully wipe up / remove spilled bioethanol before ignition. Spilled bioethanol can cause a fire and must be removed completely before ignition.
- Do not smoke, drink or eat during the filling or ignition process.
- Only use bioethanol according to the manufacturer's instructions.
- Only use original spare parts according to the manufacturer's instructions.
- Do not let the bioethanol get in contact with eyes, mucous membranes or skin and do not inhale the vapors of the bioethanol.
- Make sure that the tank is always burned out completely and no ethanol remains in the tank.

## Risk of suffocation!

Insufficient supply of fresh air can increase the carbon monoxide level in the room and cause asphyxiation.

- Use the fireplace only in sufficiently large and ventilated rooms.
- Keep an eye on signs as fatigue and poor concentration, which are caused by oxygen deficiency.

## Risk of damage!

An incorrect handling of the table-top fireplace can lead to serious damage.

- Do not place the table-top fireplace directly against a wall or under furniture, to avoid heat buildup.
- Do not use the table-top fireplace when the metal base or glass cylinder are cracked, deformed or otherwise damaged. Only use original spare parts according to the manufacturer's instructions.
- Do not expose the table-top fireplace to vibrations or shocks.
- Only use high-purity liquid bioethanol according to the manufacturer's instructions.

## Disclaimer

We accept no liability for any damages which are caused by inappropriate use of the product. We also accept no liability for direct or indirect consequential damage. Only use the fireplace for the intended purpose. We assume no liability for possible printing errors, errors and mistakes excepted!

# GENERAL INFORMATIONS

Please read this instruction manual carefully before using the product.  
Keep the manual for future reference and for the duration of owning the product.

- Please read this instruction manual carefully, especially the safety instructions before using the table-top fireplace.
- Non-observance can lead to serious injuries as well as damage to the product and surroundings.
- Keep the instruction manual always within reach.
- Use the table-top fireplace only as described in these instruction manual.
- The table-top fireplace is not a toy. Please keep children, pets and people with reduced abilities away from the fireplace.
- If you pass the table-top fireplace to a third party, be sure to include this instruction manual.

## COMPONENTS / PRODUCT DATA

### Components table-top fireplace:

- 1x metal base
- 1x glass cylinder
- 2x tank for bioethanol
- 1x tank mount
- 1x extinguisher
- 1x pliers to replace the tank
- 1x decoration stones
- 1x Instruction manual DE/EN

### Product data:

Dimensions: metal base = 9,5 x 19,5 cm  
glass cylinder = 20 x 18 cm  
total height = 29 cm

Weight: 1,75 kg

Material: powder coated steel, stainless steel,  
borosilicate glass, natural stone

Max. Capacity: 190 ml (per tank)

Max. Duration: 120 minutes (per tank)

Room volume: min. 36 m<sup>3</sup>

## OPERATION / CLEANING

### Before first use:

- Take the table-top fireplace out of the package and make sure that the fireplace is complete (see image above).
- Remove all packing materials and protective films.
- Take your time and inspect the table-top fireplace and components carefully for damage. If the fireplace is damaged (cracked, deformed or otherwise damaged) do not use the table-top fireplace and contact the manufacturer.
- Before first use, clean all the components of the table-top fireplace.

### Cleaning:

- Make sure that the table-top fireplace is completely cooled down before cleaning.
- The fiber inserts ("cotton") inside the tank ensure uniform combustion of the bioethanol and are extremely durable. The fiber inserts remain in the tanks completely. Replacements can be obtained from the manufacturer.
- The colour of the tank, tank mount and decoration stones can change over time - this is a natural process due to the heat.
- Do not use any sharp items or aggressive cleaning materials when cleaning the table fireplace.

## ASSEMBLY AND IGNITION

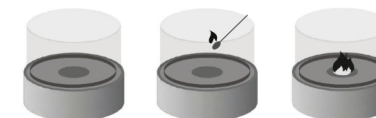

### 1. Assembly

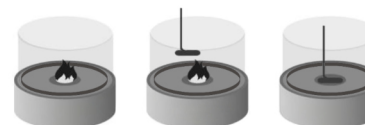

### 2. Filling the tank with bioethanol

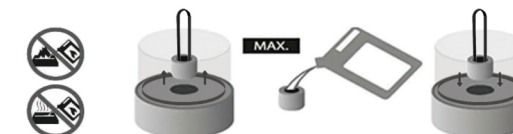

### 3. Igniting the bioethanol

### 4. Extinguishing the flame

### 5. Refilling the tank with bioethanol

Please read the safety instructions, in particular the points for "Risk of injury and fire" before using the fireplace!

### Refilling the tank with bioethanol

- Do not add bioethanol when the table-top fireplace is still hot! Please make sure that the table-top fireplace and the tanks are completely cooled down.
- After the table-top fireplace and tank have cooled down, fill the tank with bioethanol (step 5.)

### Storage of the table-top fireplace

- Please make sure that the table-top fireplace is completely cooled down before first contact.
- Make sure that the tank is always burned out completely and no ethanol remains in the tank.
- Store the table-top fireplace in a cool place, away from children and pets.

### Storage and handling with bioethanol

- Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking!
- Highly flammable liquid and vapour.
- Do not store the bioethanol in direct sunlight and protect it from heating. Store it only in a dry and cool place.
- Dispose of contents / container accordance to local / national regulations.

After filling the tank with bioethanol, make sure that the container with the bioethanol is carefully closed and out of reach before lighting the table -top fireplace.

## INSTRUCTION VIDEO

Scan the QR-Code to get our video instruction for the fireplace.

Alternatively you can find the video under following link:

**NOTICE!** Please note that you must return the fireplace in case of return (right of withdrawal / Distance Selling Act) in the condition as you received it. This means that the fireplace must be new, unused, undamaged and complete.

**Distance Selling Act applies:** Through using the fireplace, your legal right of withdrawal expires, as the fireplace is no longer new / unused after use and inevitably shows signs of use that can no longer be removed.
